

REBUILT WITH FULL MARKET INTELLIGENCE

TruckSmarter Partnership Playbook

The complete execution guide for Cecilia Gulley, CSO — repositioned around **IEBC's Phase 2 AI advantage**. TruckSmarter finds and verifies loads. IEBC runs everything after that. This playbook covers the technical landscape, exact positioning, outreach scripts, follow-up sequences, integration roadmap, and 30-day execution timeline.

PREPARED FOR

Cecilia Gulley — CSO, IEBC / 3 Lakes Logistics

PREPARED BY

Mark Odom — CEO, IEBC Business Consultants

DATE

June 2026

APPROACH

IEBC Tech Partnership — No Broker License Required

IMPORTANT: Do NOT mention 3 Lakes Logistics as a broker or reference MC numbers in any outreach. We lead 100% as IEBC Business Consultants — AI systems company. Read Section 2 before making any contact.

1 TRUCKSMARTER — WHAT THEY'VE ACTUALLY BUILT

Intelligence brief

The Platform at a Glance

TruckSmarter is a VC-backed (\$20M+ raised) free trucking super-app. Their load board aggregates **100,000+ daily loads** from major brokers (C.H. Robinson, Spot, Armstrong, and 100+ others). Unlike DAT or Truckstop, the load board is completely free — they monetize downstream via **freight factoring at 2.5–3% for same-day payouts** and carrier services.

Their \$49/Month AI Dispatch Tool

TruckSmarter's AI Dispatch assistant monitors lanes 24/7 based on carrier preferences (RPM, max deadhead, weight, trailer type). It actively:

- ✓ Calls brokers to verify if loads are still live
- ✓ Navigates phone trees and holds
- ✓ Sends professional bid emails on carrier's behalf
- ✓ Filters and surfaces the best matching freight

Price: \$49/month per carrier.

What Their AI Does NOT Do

TruckSmarter's AI stops the moment the broker responds. After that, everything is manual:

- × Rate negotiation (multi-step back-and-forth)
- × Contract and rate confirmation generation
- × BOL and dispatch documentation
- × Multi-dispatcher TMS backend
- × Invoicing and carrier settlement
- × Persistent memory across negotiations
- × Enterprise multi-fleet operations

This is the gap IEBC fills.

Their Partner Ecosystem

Parade: TruckSmarter integrates with Parade (broker-side capacity management). Brokers post a load to Parade → it instantly pushes to TruckSmarter carriers for "Book Now" execution. This is a key integration channel for 3LL once we're licensed.

TCS Fuel Cards: Partnered to embed route-level fuel intelligence into their AI dispatch tool — carriers see true net profit (gross rate minus exact fuel cost per route) before booking. This is the type of embedded service partnership model TruckSmarter actively pursues.

Account Aggregation: Carriers can connect DAT, Truckstop, and broker portals directly into TruckSmarter — all loads in one unified search. This creates a clean API integration opportunity for IEBC.

2 IEBC POSITIONING — THE PHASE 2 ADVANTAGE

Read this before any outreach

The Core Pitch in One Sentence

"TruckSmarter built an exceptional Phase 1 AI — finding, verifying, and bidding on freight. IEBC built Phase 2 — everything that happens after the broker responds. Together, it's a complete autonomous freight operation from load search to carrier payment."

FULL CAPABILITY COMPARISON

CAPABILITY	TRUCKSMARTER AI (\$49/MO)	IEBC AI SYSTEM
Load search & filtering	✓ Core feature	— (uses TruckSmarter's feed)
Broker verification calls	✓ Automated	— (TruckSmarter handles)
Initial bid email	✓ Automated	— (TruckSmarter handles)
Rate negotiation (back & forth)	✗ Not available	✓ Multi-agent AI
Contract & rate confirmation	✗ Not available	✓ Auto-generated
BOL & dispatch documents	✗ Not available	✓ Auto-generated
Multi-dispatcher TMS	✗ Not available	✓ Eagle Eye platform
Invoicing & settlement	✗ Not available	✓ Settler automation
Persistent agent memory	✗ Not available	✓ pgvector / Supabase
50+ specialized AI personas	✗ Single dispatch AI	✓ Full agent network
Mobile app (Android)	✓ iOS & Android	✓ Android (Play Store)

3

THE THREE PARTNERSHIP MODELS

Pick the right angle for each conversation

Model A — White-Label "TruckSmarter Pro" (Best Outcome)

TruckSmarter offers IEBC's Phase 2 AI suite as a premium tier above their \$49/mo tool — branded as "TruckSmarter Pro" or "TruckSmarter Complete." They set the price (\$149–\$299/mo), collect it, pay IEBC a wholesale rate, keep the margin. Their users get a complete end-to-end automated freight operation. TruckSmarter gains a new recurring revenue stream without building anything. IEBC gets distribution to hundreds of thousands of carriers.

Model B — Preferred Tech Partner (Most Likely First Step)

IEBC is listed as a recommended/preferred tool partner on TruckSmarter's partner page — similar to how TCS Fuel Cards is featured. TruckSmarter promotes IEBC to their user base as the "back-office AI" that pairs with TruckSmarter's dispatch tool. Revenue flows to IEBC directly. TruckSmarter earns referral fees or affiliate revenue per signup. This is an easier agreement to reach and creates proof before pursuing Model A.

Model C — API Integration Partnership (Technical Angle)

IEBC builds a direct integration between Eagle Eye and TruckSmarter's load feed API. TruckSmarter's load data flows into Eagle Eye's dispatch agents in real time. IEBC can use this to demonstrate technical depth AND propose that TruckSmarter resell the integration as a premium feature to enterprise carrier accounts and small fleet operators.

4

STEP-BY-STEP EXECUTION — WEEK 1

Do these in exact order

Stop. Read This First.

We do not have an MC number. We are not pitching as a freight broker. Every outreach goes out as **IEBC Business Consultants** — an AI systems company. Do not mention 3 Lakes Logistics in any first contact. Do not discuss load posting. The pitch is entirely about our tech and their carrier users. Keep it clean.

1

FREE — NO CREDENTIALS NEEDED

Create a Carrier Account on TruckSmarter

Go to **trucksmarter.com** — create a free carrier account. No MC number required for a basic carrier account. Use a personal or IEBC email.

Why: This gives you inside access to their platform so you can understand exactly what their \$49 AI Dispatch does and doesn't do — making your pitch surgical. You'll see their UX, their feature set, and where the experience breaks. You can reference this on the call: "We're users of your platform — we saw the gap firsthand."

2

DO TODAY

Sign Up for TruckSmarter's \$49 AI Dispatch Trial

Within the carrier account, sign up for their AI Dispatch product. Run it for 48–72 hours. See exactly where it ends — the moment a broker responds and the AI goes silent.

This is your proof point. On the partnership call you can say: "We tested your AI Dispatch. It's excellent at Phase 1. The moment [broker] responded with a counteroffer, it stopped. That's where IEBC picks up." That specificity wins the room.

3

DO TODAY

Find the Right LinkedIn Contact

Go to **LinkedIn.com** → search "TruckSmarter" → Company page → People tab.

Search for these titles in order: **Head of Partnerships** → **VP Business Development** → **Director of Growth** → **Head of Revenue** → **CEO / Co-Founder**.

TruckSmarter is a startup — if no dedicated BD role exists, go straight to the founder. Write down: full name, exact title, and profile URL. You'll need this for Steps 4 and 5.

4

DO TODAY

Find Their Direct Email

Try in this order:

1. **hunter.io** — free plan, type "trucksmarter.com" to find verified emails on their domain
2. Try **partnerships@trucksmarter.com** and **bd@trucksmarter.com**
3. Check trucksmarter.com footer and contact page
4. Their LinkedIn "About" section sometimes lists a business email

Most startups use `firstname@domain.com` format. Once you know their name, try that format first.

5

TODAY / TOMORROW

Send LinkedIn Connection Request

Use the **exact message in Section 5**. Do not improvise. The LinkedIn note is short by design — its only job is to get the connection accepted. Do not pitch anything in the connection note.

6

DAY 2-3

Send Partnership Email from Eagle Eye

Use the **exact email in Section 6**. Send from **cece@3lakeslogistics.com** via Eagle Eye. Fill in [Name] only.

Send **Tuesday, Wednesday, or Thursday — 8–10am Pacific time** (TruckSmarter is SF-based). Do not send Friday afternoon or Monday morning. Log the send date and contact name in Eagle Eye.

7

WHEN THEY REPLY

Notify Mark Before Responding Further

The moment TruckSmarter responds — email, LinkedIn, phone — **notify Mark Odom immediately** before sending any reply. Do not discuss pricing, deal terms, technical specs, or partnership structure without Mark present. Cecilia's job is to open the door. Mark closes the deal.

8

DAY 3-7

Report Status Back to Mark

After executing Steps 1–7, report to Mark:

- ✓ Carrier account created? (Y/N)
- ✓ AI Dispatch trial activated? (Y/N) — what did you observe?
- ✓ LinkedIn contact found? Name + title
- ✓ Connection request sent? (Y/N)
- ✓ Email sent? (Y/N) — date sent, recipient
- ✓ Any replies received?

5

LINKEDIN CONNECTION MESSAGE

Use word for word — 300 character limit

Instructions

Replace [First Name] with their first name. Send exactly as written. Do not add anything. The note must stay under 300 characters. Its only purpose is to get the connection accepted — not to pitch. The pitch comes in email after they connect.

LINKEDIN CONNECTION NOTE — COPY EXACTLY

Hi [First Name] — I'm CSO at IEBC Business Consultants. We build AI back-office systems for owner-operators and small fleets. I think there's a clean tech partnership angle with TruckSmarter — our AI picks up exactly where your dispatch tool hands off. Worth a quick connect.

After They Accept — Send This Follow-Up in LinkedIn

"Thanks for connecting [First Name]. I'll shoot you a quick email outlining what I have in mind — keep an eye out from cece@3lakeslogistics.com." Then immediately send the email in Section 6.

6 PARTNERSHIP EMAIL — FULL SCRIPT

Send from Eagle Eye · cece@3lakeslogistics.com

Before Sending — Checklist

- ☐ Replace [Name] with their first name | ☐ Replace [Title] with their actual title | ☐ Send Tuesday–Thursday 8–10am Pacific | ☐ Send from cece@3lakeslogistics.com via Eagle Eye | ☐ No attachments on first email

FROM: Cecilia Gulley <cece@3lakeslogistics.com>

TO: [Name] <[email]@trucksmarter.com>

SUBJECT: IEBC + TruckSmarter — AI that picks up where your dispatch tool hands off

Hi [Name],

I'll get straight to it.

My name is Cecilia Gulley. I'm the Chief Strategy Officer at **IEBC Business Consultants**. We build AI-powered back-office systems for owner-operators and small fleet operators — and we've been using TruckSmarter's platform while building out our own dispatch automation stack.

Here's what we observed: Your AI Dispatch is exceptional at Phase 1 — finding loads, verifying they're live, sending the initial bid. It's genuinely the best tool in the market for that. But the moment a broker responds with a counter, your tool hands the conversation back to the carrier. From there, everything is manual — negotiation, paperwork, rate confirmation, invoicing, settlement.

That's exactly where IEBC's system picks up.

We've built the Phase 2 layer:

- Multi-step rate negotiation handled by AI agents (no human back-and-forth)
- Rate confirmations and contracts auto-generated at agreement
- BOL, dispatch docs, and carrier agreements automated end-to-end
- Full TMS backend for multi-dispatcher operations
- Invoicing and weekly carrier settlement automation
- Persistent AI memory across all negotiations and carrier relationships

Your users currently pay \$49/month for Phase 1 and then manually manage everything after. We can complete that picture — offered as a premium tier above your current product, white-labeled under TruckSmarter or as a preferred partner integration.

TruckSmarter keeps the customer relationship and the margin. IEBC handles the technology and delivery. Your

carrier base gets a complete autonomous freight operation, not just a load finder.

I'd love 20 minutes to walk through the specifics — what the integration looks like technically, and what the revenue model could look like for TruckSmarter.

Is there time this week or next?

Cecilia Gulley Chief Strategy Officer — IEBC Business Consultants cece@3lakeslogistics.com Detroit, MI

7 FOLLOW-UP SEQUENCE

Execute in order if no reply

The Rule — Three Touches, Then Pivot to Founder

Send the initial email. If no reply in 7 days, send Day 7 follow-up. If still no reply after Day 14, send Day 14 message. If three emails produce no response, pivot directly to the CEO or co-founder on LinkedIn. Never send more than 3 emails to the same person.

DAY 7 Quick Bump — Same Thread

Subject: Re: IEBC + TruckSmarter — AI that picks up where your dispatch tool hands off

"Hi [Name] — bumping this up in case it got buried. The short version: we've built the back-office AI that pairs with TruckSmarter's dispatch tool — rate negotiation, contracts, settlement, TMS backend. Happy to send a one-pager if it's easier to review async, or connect you with the right person on our end. — Cecilia"

DAY 14 New Angle — Reference the Product Gap Directly

Subject: One specific question about TruckSmarter's roadmap

"Hi [Name] — I'll make this quick. We've been using your AI Dispatch and love what it does for Phase 1 (find, verify, bid). Quick question: is rate negotiation automation on your product roadmap? We've built that layer and are looking at partnership options for distribution. If it's already on your roadmap, we step back. If not, there might be something worth a quick call. Either way, appreciate your time. — Cecilia, IEBC"

DAY 21 Pivot to CEO / Co-Founder on LinkedIn

If zero response from partnerships contact, find TruckSmarter's CEO or co-founder on LinkedIn. Send a short connection note: "Hi [Name] — CEO at IEBC. We build the AI back-office layer that pairs with your dispatch tool. We're already users of TruckSmarter. Think there's a real partnership play here — would love to connect briefly." Founders at this stage respond to specific, technical partnership pitches from other founders.

8 THE PARADE PARALLEL STRATEGY

Run simultaneously — don't wait on TruckSmarter

What Is Parade?

Parade is a broker-side capacity management platform that feeds loads directly into TruckSmarter's carrier network. Brokers who use Parade get their loads pushed to TruckSmarter for "Book Now" execution automatically. Parade is the B2B enterprise layer that TruckSmarter built their broker integrations through — making Parade a separate and equally important partnership target.

Why Approach Parade

Parade serves freight brokers directly — the exact customers who need IEBC's automation. A partnership with Parade means IEBC tools reach small-to-mid brokers who are already plugged into the TruckSmarter ecosystem. It's a parallel distribution channel to the same market.

Website: parade.ai

Search: "Parade" + "Partnerships" on LinkedIn

The Pitch to Parade

"Your brokers post loads to Parade and push to TruckSmarter carriers. Once the carrier accepts, everything goes manual — rate negotiation, contracts, settlement. IEBC automates that entire post-acceptance workflow for your broker clients. We'd like to explore a broker-facing integration."

Same Phase 2 angle. Different audience.

9

TECHNICAL INTEGRATION — HOW IT WOULD WORK

For reference on the call — Mark leads this conversation

Cecilia: You Do Not Need to Explain This on the Call

This section is background for you to understand what's possible. If TruckSmarter asks technical questions, say "Our CEO Mark Odom is our technical lead — I'll bring him into the next conversation to walk through the integration specifics." Do not attempt to explain API architecture yourself.

INTEGRATION ARCHITECTURE — EAGLE EYE ↔ TRUCKSMARTER

LOAD FEED	TruckSmarter's web portal runs on structured GraphQL/REST APIs. Their load data can be pulled programmatically into Eagle Eye's dispatch agents, giving IEBC access to 100K+ daily loads without paying DAT or Truckstop fees.
RPA OPTION	If API access isn't part of the partnership, an n8n RPA automation flow can aggregate TruckSmarter search results and feed them into Eagle Eye — a zero-cost integration approach that doesn't require TruckSmarter's cooperation.
HANDOFF POINT	TruckSmarter AI sends the bid email. Broker responds. Eagle Eye's Claude-powered agents take the thread — they handle negotiation, generate rate confirmation, and pass to dispatch queue automatically.
TMS BACKEND	Eagle Eye runs the multi-dispatcher TMS layer TruckSmarter doesn't have — load board, dispatch coordination, carrier comms, BOL tracking, and settlement, all in one platform.
MEMORY LAYER	Supabase + pgvector gives IEBC's agents persistent memory — they remember carrier preferences, negotiation history, and relationship context across every interaction. TruckSmarter has no equivalent.

TIER / SCENARIO	MONTHLY PRICE TO CARRIER	TRUCKSMARTER KEEPS	IEBC WHOLESALE
Phase 2 Add-On (above \$49 tier)	\$149/mo	~\$50–75/user	~\$74–99/user
TruckSmarter Pro (bundled)	\$199/mo (Phase 1 + 2)	~\$75–100/user	~\$99/user
Enterprise Fleet (5+ trucks)	\$499/mo	~\$150–200/mo	~\$299/mo
100 Carrier Users (Phase 2)	avg \$149/mo	\$5,000–7,500/mo	\$7,400–9,900/mo
500 Carrier Users (Phase 2)	avg \$149/mo	\$25,000–37,500/mo	\$37,000–49,500/mo
1,000 Carrier Users (scale)	avg \$149/mo	\$50,000–75,000/mo	\$74,000+/mo recurring

Key Talking Point on Revenue

"You already have the users. We already have the product. TruckSmarter keeps the customer relationship, sets the price, and earns the margin on every user. IEBC handles the technology, support, and delivery. You add a significant recurring revenue line without writing a single line of code."

Day 1

Create Carrier Account + Activate \$49 AI Dispatch Trial

Sign up at trucksmarter.com as a carrier (free, no MC# needed). Activate the AI Dispatch trial. Observe exactly where it stops — this becomes your pitch proof point.

Day 1

Find LinkedIn Contact + Direct Email

Search TruckSmarter on LinkedIn → People tab → find Head of Partnerships or equivalent. Use hunter.io to find their direct email. Write both down.

Day 1-2

Send LinkedIn Connection Request

Use the exact script in Section 5. Wait for connection acceptance before sending the follow-up message.

Day 2-3

Send Partnership Email from Eagle Eye

Use the full email in Section 6. Send Tuesday–Thursday, 8–10am Pacific. Log in Eagle Eye. No attachments.

Day 2-3

Simultaneously — Find Parade's BD Contact

Search parade.ai and LinkedIn for "Parade" partnerships contacts. Use the same Phase 2 positioning, different audience (brokers not carriers). Run both outreach streams in parallel.

Day 7

Day 7 Follow-Up (if no reply)

Send Day 7 bump email from Section 7. 2–3 sentences only. No new attachment.

Day 7-14

If They Reply — Notify Mark Immediately

Do not reply further without Mark. Offer 2–3 specific call times. Example: "I have Tuesday 10am–12pm ET or Thursday 2–4pm ET — does either work?" Confirm the call and brief Mark on everything observed from the AI Dispatch trial.

Day 14

Day 14 Follow-Up — Roadmap Question Angle

Use the "one specific question about your roadmap" email from Section 7. This reframes the conversation and often gets a reply when the first emails didn't.

Day 21

Pivot to CEO/Co-Founder if Needed

Find and message TruckSmarter's CEO or co-founder directly on LinkedIn. Brief, founder-to-founder framing. Reference being an active user of their platform.

Day 30

Target: Discovery Call Completed — Framework Agreed

Goal is a completed intro call with a clear next step — whether that's a technical demo, a partnership agreement draft, or a defined pilot program. Mark leads from here.

RESEARCH & SETUP

- ☐ Create free carrier account on trucksmarter.com
- ☐ Activate \$49 AI Dispatch trial
- ☐ Document where AI Dispatch stops (screenshot it)
- ☐ Note exact feature gaps you observed firsthand
- ☐ Find LinkedIn contact — name, title, profile URL
- ☐ Find direct email via hunter.io or website
- ☐ Locate Parade BD contact as parallel target

OUTREACH EXECUTION

- ☐ Send LinkedIn connection note (Section 5 script)
- ☐ Send partnership email from Eagle Eye (Section 6)
- ☐ Log send date and contact in Eagle Eye
- ☐ Send Day 7 follow-up if no reply
- ☐ Send Day 14 follow-up if no reply
- ☐ Send Parade outreach in parallel (Day 2–3)
- ☐ Notify Mark immediately upon any reply
- ☐ Schedule intro call with 3 time slot options
- ☐ Brief Mark before the call with all observations

Final Reminder — What NOT to Say

- × Do NOT mention 3 Lakes Logistics as a broker
- × Do NOT mention MC numbers or DOT numbers
- × Do NOT discuss load posting or freight coverage
- × Do NOT negotiate pricing or deal terms without Mark
- × Do NOT send a second attachment or pitch deck without Mark's approval
- × Do NOT say "we're still getting our broker license" — it undermines the pitch

Lead as **IEBC Business Consultants — AI systems company**. That's the identity. That's the pitch. Stay in your lane.
