

3 LAKES LIGHT FLEET

Post-Signup Driver Questionnaire

Sent as a follow-up to the driver welcome email | Prepared: July 15, 2026

This questionnaire is delivered to a new Light Fleet driver shortly after the automated welcome email/SMS sequence (Maya workflow), and before the scheduled welcome call. It confirms driver readiness, captures service and scheduling preferences, and surfaces anything blocking a first trip — so onboarding coordinators and the welcome-call script have real signal before outreach.

Audience	Newly signed-up Light Fleet drivers (NEMT, Executive, Courier, Gig)
Trigger point	After welcome email/SMS (Step 2) — before welcome call (Step 3)
Format	25 questions across 8 sections; multiple-choice + open text
Owner	Onboarding / Driver Success

SECTION 1 — CONFIRM YOUR DETAILS

IMPLEMENTATION NOTES

- Natural insertion point: a new scheduled step between the welcome email (Step 2) and the welcome call (Step 3) in the Maya welcome workflow, so answers — especially availability, training needs, and blockers — can feed the welcome-call script.
- Responses can be stored in a new `driver_intake_responses` table keyed by `driver_id`, mirroring how `insurance_compliance` / `banking_accounts` are keyed off `carrier_id` elsewhere in the system.
- Recommended delivery channel: emailed link to a short hosted form (mobile-friendly), with an SMS nudge if not completed within 24 hours.
